

XKT-412A PCB WIRELESS CHARGING MODULE

The main technical parameters of the module:

The transmitter module is powered by adaptive mode and can operate directly from 5V to 12V

Transmitter module no-load current: 30 ~ 55mA

Launch PCB board size: 61mm * 41mm * 1mm

Received PCB board size: 41mm * 31mm * 0.3mm

Receive module maximum output current: 5V / 700mA (the receiver board to change the large device can output a larger current)

Receiving module Long working current: 5V / 500mA
