Contact us

Circuit Design is a leading design and manufacturing company of low power radio products. Circuit Design designs and supplies low power narrow-band standard radio modules for short-range applications. Our RF modules are designed to serve customers in fields such as Telecommand and Telecontrol, Telemetry, and in the Alarm market where high reliability is required for industrial applications. Circuit Design's quality system is certified by ISO9001. Circuit Design's corporate objective is to enhance customer reliability and competitiveness in their radio link applications by providing the necessary narrow band products.

Facts
