

RX6788

Rx6788 2.4g -93dbm 8ch Receiver Wireless Audio Video Receiving Module for Photography Av Transmission FPV Rc Acc

- Package Includes: 1PC receiver module |
- - RX6788 is FM audio video TX module working in 2414-2468MHz ISM frequency band
- - Adopting single chip design, integrating VCO, PLL, wide band FM video demodulation
- Use: Vehicles & Remote Control Toys
- Material: EVA

Product description

RX6788 2.4G -93dBm 8CH Receiver Wireless Audio Video Receiving Module For Photography AV Transmission FPV RC Acc

Descriptions:

- RX6788 is FM audio video TX module working in 2414-2468MHz ISM frequency band
- Adopting single chip design, integrating VCO, PLL, wide band FM video demodulation

Specifications:

- Model: RX6788
- Working freq.: 2.4GHz
- Size: 45mm*30mm*4.8mm
- Weight: 10g
- Current: around 150mA
- Voltage: 5V
- Sensitivity: -93dBm
- Built-in frequency PLL high stability
- Low clutter leakage
- Direct output audio and video signals

SMD installation, user -friendly.

Two groups 8CH of supported frequency

CH 1 = 2414MHZ CH 2 = 2432MHZ

CH 3 = 245050MHZ... CH 4 = 2468MHZ

CH 5 = 2390MHZ CH 6 = 2490MHZ

CH 7 = 237070MHZ = CH = 2510101010MHZ

Package includes:

1PC receiver module

Item specifics:

Use: Vehicles & Remote Control Toys

Material: EVA

Rc parts & accs: Receivers

Upgrade parts/accessories: Tires

Four-wheel drive attributes: Assemblage

Tool supplies: Battery

For vehicle type: Airplanes

Model number: a55

Technical parameters: KV1100

Size: aad

Wheelbase: Screws

Use: Vehicles & Remote Control Toys

For vehicle type: Airplanes

Material: other
