SAFEIR Series
 40TTS12PbF

PHASE CONTROL SCR
 Lead-Free ("PbF" suffix)

Description/ Features

The 40TTS12PbF **SAFEIR** series of silicon controlled rectifiers are specifically designed for medium power switching and phase control applications. The glass passivation technology used has reliable operation up to 140°C junction temperature.

Typical applications are in input rectification (soft start) and these products are designed to be used with International Rectifier input diodes, switches and output rectifiers which are available in identical package outlines.
