

ISOLATED UNREGULATED DUAL OUTPUT DC/DC CONVERTER**MICRODC**

BxxxxS-1W SERIES

DESCRIPTION

The BxxxxS-1W series of DC/DC Converters is particularly suited to isolating and/or converting DC power rails. The galvanic isolation allows the device to be configured to provide an isolated negative rail in systems where only positive rails exist. The wide temperature range guarantees startup from -40°C and full 1 watt output at 85°C . For lower ripple, refer to output ripple reduction section.

ISOLATED UNREGULATED DUAL OUTPUT DC/DC CONVERTER**MICRODC**

BxxxxS-1W SERIES

When operated with additional external load capacitance the rise time of the input voltage will determine the maximum external capacitance value for guaranteed start up. The slower the rise time of the input voltage the greater the maximum value of the additional external capacitance for reliable start up.
