company info
Lante Electronic Technology Co., Ltd. is one of the most reputable Mobile phone instruments and softwares producing and servicing business company all over the world, located at 3F, Zhoushai Electronics Centre, 25TR, XITI Road, Guangzhou. Our main products are Mobile Phones Maintaining instruments and Softwares and we are finding coordinators all over the world.

Main Products:
NET2000 Mobile Phone Software Maintaining King, which we put into market in 2002, is our newest product after we have produced NET2000 Mobile Phone Software Maintaining Bible. With its versions updating, NET2000 King is better and better, having more functions and conveniences to use, and get a leading market share in Mobile Phones Maintaining field.
The NET2000 serial softwares and instruments are used by more and more customers to maintain mobiles, and that the NET2000 King goes into market will give great surprise and convenience to these customers, because we have great updating of functions and interface in NET2000 King, such as FLASH, change EPROM, unlock phone, unlock network, change IMEI, upgrade phone Processor logo and edit rings(with the help of PC).
It can do of eight main series: MOTOROLA, NOKIA, ERICSSON, SAMSUNG, PANASONIC, SIEMENS, PHILIPS and SONY. It adds WRITE LANGUAGE FILES, UNLOCK 8-bit, CHANGE IMEI (EMMI BOX)....and it has more human interfaces for easier usage, software installation and operation are greater too.And it can updates directly, unlike NET2000 Instrument which only can update after changing the main machine.
