

National Instruments Software Showcase 1.1

Thank you for taking the time to look at the National Instruments Software Showcase.

This README file will give you additional instructions on how to run and install the various pieces of the Showcase.

1. The Showcase requires the presence of Apple QuickTime software on your computer.
If you do not have it, you can install it from the Showcase CD. It can be found in the directory INSTALL\QT\PC. Simply run setup.exe to install QuickTime on your computer.
2. Several files on the Showcase CD are in Adobe Acrobat PDF format. To view them, you need the Adobe Acrobat Reader. If you do not have it, you can install it from the Showcase CD. It can be found in the directory INSTALL\ACROBAT\PC. Simply run acroread.exe to install the Adobe Acrobat Reader on your computer.
3. The Showcase contains QuickTime movies with sound. For those users without sound capabilities, we have provided scripts in Adobe Acrobat format that you can print

out and use to follow along with the movies. These scripts are located in the SCRIPTS directory on the Showcase CD.

4. The Showcase contains fully functional demonstration versions of several National Instruments Software Products. These demos can be accessed through the Software Showcase multimedia presentation (look in the DEMOS section for each product) or directly from the CD. If you wish to access the demos directly from the CD, look in the DEMOS directory. The LabVIEW and LabWindows/CVI demos also contain, in Adobe Acrobat format, tutorial manuals to help you learn as much as possible about the products.

Enjoy the National Instruments Software Showcase.
