Welcome to Practical Electronics Magazine - the UK's No. 1 hobby electronics magazine

NEW SHOPPING CART NOW ONLINE!

Our new website and shopping cart will bring you a fresh new design together with modern navigation features. During a period of transition, areas of our current website will still be operating, so watch this space for more news in the next few weeks!

During the next few weeks we're migrating the PE website over to a brand new platform, starting with an all-new online shop. It's the best way to buy back issues and reprints, printed circuit boards, electronics books, CD-ROMs and more - all your favourite PE products and services sent direct from the UK to your door! *We apologise for the inconvenience and thank readers for their patience during this important upgrade.*

Practical Electronics (PE) is the No. 1 UK magazine for hobby electronics enthusiasts everywhere. Each month's issue is packed with practical

constructional projects for the hobbyist, special features, advice and adverts from specialist electronics suppliers and more besides.

PE is available **worldwide** from good newsstands, on subscription delivered direct to your door and is now downloadable from Pocketmags for viewing on an PC, iPad and other devices as well.

There's something to appeal to audio, radio, automotive, home, test equipment, marine and many more interests. Microcontroller fans will enjoy our PICmicro projects and free source codes are usually downloadable too. (Our [Regulars](#) page has more details.)

Here at PE we're very proud of our heritage, having built the 1960's hobby electronics market in Britain from scratch. PE's Alan Winstanley wrote this two-part special article describing the origins of *Practical Electronics* magazine in the UK, followed by the arrival of its little sister *Everyday Electronics*. The articles show how our title evolved over many years, including cover shots of some milestone issues, taking in ETI (UK) and Hobby Electronics along the way.
