

## WIKA Group

Over the past 70 years WIKA has built a reputation as a renowned partner and competent specialist for any task in the field of measurement technology. On the basis of steadily growing efficiency, innovative technologies are applied when developing new products and system solutions. The reliability of the products and the readiness to face all challenges of the market have been the key factors for WIKA to achieve a leading position in the global market.

Within the WIKA Group, currently 10,000 employees are dedicated to maintain and improve technology in pressure, temperature, force and level measurement, and also in the fields of flow measurement, calibration and SF<sub>6</sub> gas solutions. Over 500 experienced employees within the sales department consult customers and users competently on a partnership basis. More than 300 engineers and technicians are searching continually to provide innovative product solutions, improved materials and profitable production methods. In close co-operation with recognised universities, institutions and industrial companies, solutions for specific applications are developed and designed.

Think global, act local: Following the founding of the first subsidiary in 1960, there are now 43 subsidiaries within the WIKA Group. These include state-of-the-art production facilities in all central markets, maintenance facilities, installation equipment and teams for additional services. WIKA is also represented around the world by numerous sales agencies. In order to offer the customers a comprehensive product range, the portfolio is constantly being expanded through strategic acquisitions.
