

AT91SAM9G20-EK CDROM

Dear Customer,

Welcome to the world of AT91SAM! Our microcontrollers offer you the best in ARM-based Flash Microcontrollers and Embedded MPUs and cover the entire spectrum from cost-effective, ultra-low-power devices to high-performance systems-on-chip. More information please visit [ATMEL](#) web site.

Thank you for purchasing an ATMEL AT91SAM9G20 Evaluation Kit! The AT91SAM9G20-EK provides you with everything you need to get started quickly with code development on the AT91SAM9G20.

This CD-ROM contains development tool chains and a single example project. The Getting Started section gives you step-by-step instructions on how to rebuild this project and to download it on the board.

We recommend that you visit the Atmel Web site, either the [AT91SAM9G20 Product Page](#) or the [AT91SAM9G20 Evaluation Kit Page](#). Here you will find all the most up-to-date valuable resources to help you beat time-to-market constraints:

- A full set of documentation on the AT91SAM9G20
- The User Guide of the AT91SAM9G20-EK
- A wide range of development and programming tools
- The latest AT91SAM9G20-EK Software Package, which includes a full set of peripheral programming examples
- Several demos from our partners and links to their Web sites

and much more ...

You can also find AT91SAM partners listed there:

<http://www.atmel.com/products/AT91/thirdparty.asp>

In the unlikely event that you experience problems in finding the information you need, your distributor, Atmel Sales

Representative or local Atmel Sales office is available to help. They are listed on the Atmel web site:

<http://www.atmel.com/dyn/general/contact.asp>

Thank you for your confidence in Atmel's AT91SAM products!

Sincerely,

The AT91SAM Team
