

THX208 switch power module 700mA 3.5w AC-DC step-down module

LC THX208 switching power supply module is isolation industrial-grade module .It has function of temperature protection, over current protection and short circuit protection, high and low voltage isolation, AC85 ~ 265 v wide range input voltage, 431 precision voltage stability ,DC5V output.It features small size, stable performance, cost-effective

Voltage input AC 85 ~ 265v 50/60HZ或DC 100v ~ 370v

Voltage output DC5V ($\pm 0.2V$)

Current output 700mA

Power 3.5W

function of temperature protection, over current protection and short circuit protection,

Working environment :

work temperature-20~60°C

Humidity 40~90%RH

Board size :23.5*56.8mm

Interface instruction :

L,N Respectively connect the fire and zero lines of alternating current.

+、 - : Positive and negative of power supply 5V

2. test guide :

Measure voltage of + - PIN is 5V or not ,when L,N connects to 220V
