

## CH376s usb read write module supports USB Control transfer 6MHz

1. The CH376 chip curing grease file system, file operation is simple, fast,
2. support U disk, USB hard drive, USB flash drive and USB card reader, USB storage device
3. SD card standard capacity, high capacity SD card and protocol compatible MMC, TF card
4. supports a variety of communication interfaces: 8-bit parallel, SPI interface and asynchronous serial
5. Compatibility: equipment form compatible with CH372 compatible with CH375
- 6 Module size: 50mm × 34mm
