

CJMCU-115 Color Sensor TCS3414CS Color Distinguish Module

Features:

- I2C 16bits digital output, 400KHz
- The latest version of the color sensor module TCS3414CS
- SYNC Input Synchronizes Integration Cycle to Modulated Light Sources
- Operating Temperature Range -40°C to 85°C
- Programmable Interrupt Function with User-Defined Upper and Lower Threshold Settings

Application:

- Ambient light sensor
- Object color sensing
- Consumer Toys
- Industrial Process Control
- Tablets, Laptops, Monitors
- HDTVs
