

Rii i8 2.4GHz RF Mini Wireless Keyboard with Touch Pad Mouse Black UK Layout KODI XBMC Raspberry Pi Android Box HTPC IPTV Remote Control

- 2 in 1 2.4Ghz Mini Wireless keyboard with Touch Pad Mouse with multimedia function keys.
- Innovative Shape, Portable, elegant, Perfect for PC Laptop Pad Google KODI XBMC Android TV Box HTPC IPTV Smart TV Mac IOS Raspberry Pi. Not work with the amazon fire TV stick!

Generally, this keyboard works well on smart TV. But some smart TVs do not support external input device, especially Samsung. Before you place order, try the common wired keyboard and mouse on your smart TV. If the keyboard and mouse all work well, this keyboard-mouse combo can too.

- Built-in rechargeable and removable lithium battery. Power Save Design: With auto sleep - wake up function

- use an app called app2fire on android you can send any app to fire TV then run it so for example Google chrome the keyboard works as mouse and keyboard, just note that it only works on side loaded applications for example (Google chrome , firefox , show box) ps KODI is a native app on fire os 5 and our keyboards work on it without side loading.
