ALABEL

1 Preface

With ALABEL© you have bought a sophisticated tool to retrieve
information about various components and manufacturers. The
databases for integrated circuits, electromechanical parts and
discrete semiconductors are integrated in one Windows application.
The passive components database is a DOS application. To avoid
installation and execution difficulties please refer to chapters
2 and 3.

2 Requirements

--> Hardware (min.)
386SX/33, CD-ROM drive, VGA, Mouse, 4MB RAM,
5MB free disk space, 512KB free conventional memory

--> Hardware (recommended)
486DX/50, CD-ROM 4x, SVGA, Mouse, 8MB RAM,
9MB free disk space, 512KB free conventional memory

--> Software
DOS 3.3 and Windows 3.x
or Windows 95

--> System settings
As one of the applications modules runs in the
Windows 3.x / Windows 95 DOS-Box, you have to
provide a few system settings:

AUTOEXEC.BAT: SET CLIPPER=F66
CONFIG.SYS: FILES=72
If you use EMS: DEVICE=EMM386.EXE 2048
If you do not use EMS: DEVICE=EMM386.EXE NOEMS NOVCPI

The expanded memory driver (EMM386.EXE) is located in your
DOS directory. If you use Windows 95, it is located in
C:\WINDOWS\COMMAND. Please make sure, that you have at
least 512KB free conventional memory.

3 Installation

--> General
Make sure, that no other application is running.

--> Windows 3.x
Insert the ALABEL© CD-ROM into your CD drive. Run the
Program-Manager and click the menu File.
Choose Run... and enter "<x>:\SETUP.EXE" where <x> is
the drive letter of your CD drive. Press the Ok button
and follow the instructions on the screen.

--> Windows 95
Insert the ALABEL© CD-ROM into your CD drive. Windows 95 will
start the setup procedure for you. Follow the instructions on
the screen.

4 Running the application

--> Windows 3.x
Insert the ALABEL© CD-ROM into your CD drive.
Run the Program-Manager. Open the ALABEL group and perform
a double-click on one of the ALABEL icons.

--> Windows 95
Insert the ALABEL© CD-ROM into your CD drive. Windows 95 will
start the application. To run the application by hand, push the
Start button, select the ALABEL folder out of the Programs
entries and click one of the ALABEL icons.

--> DOS-Box
The application for passive components is started by either
double clicking the Passive Components icon or by selecting
the Passive Components button in the ALABEL© startup menu.
Be aware, that this part is a DOS application.
