

AVR TARGET BOARD

Product Description

With this board you can develop and prototype with any of Microchip's 40 pin AVR microcontrollers . The board have User button and status LED. The bridge rectifire allow this board to be powered with both AC and DC power supply adapters.

Features:

- DIL40 microcontroller socket
- Quartz crystall 4Mhz
- LED for Power
- Reset button
- Power plug-in jack
- Extension slot on every uC pin
- GND bus
- Vcc bus.
- Four mounting holes 3,3 mm (0,13")
- Jtag Connector
- ISP Connector
- RS232 Interfacing
