

W1209 High-precision Digital Display Thermostat

Main Features :

- Temperature range: minus 30 - 110 degrees Celsius
- Temperature control mode: ON / OFF
- Solution: when the temperature is 0.1 degrees Celsius, the resolution is 9.9 - 99.9
- Control accuracy: 0.1 degrees Celsius
- Hysteresis accuracy: 0.1 degrees Celsius
- Refresh rate: 0.5 seconds
- High temperature protection: 0 - 110 degrees Celsius
- Power supply voltage: DC 12V
- Quiescent current: less than or equal to 35 mA, draw current less than or equal to 65 mA
- Output voltage: DC 12V
- Output power: 20A relay
- Measurement input: NTC (10 K 0.5 percent) waterproof sensor
- Environmental requirements: minus 10 - 60 degrees Celsius, humidity 20 percent - 85 percent
