Official Raspberry Pi Zero Case

The Raspberry Pi Zero Case has been designed to fit both the Pi Zero and the Pi Zero W.

The case consists of two parts. It has a standard base featuring a cut-out to allow access to the GPIO, and a choice of three lids: a plain lid, a GPIO lid (allowing access to the GPIO from above), and a camera lid (which, when used with the short camera cable supplied, allows the Raspberry Pi Camera or Camera Noir to be fitted neatly inside it).

Kit includes the following:

- 1 x base
- 3 x lids (plain, GPIO, camera)
- 1 x short camera cable
- 4 x rubber feet
